

Save your plastic strawberry baskets — they make charming containers for colored ornaments. First spray the baskets gold or a bright color. Then make the containers by placing one basket upside down on another and joining them with bright ribbon where their rims meet. You can put the ornament in first, or, if it's easier, just before you completely close the baskets. Place the filled baskets on a mantle or table, or hang them with wide ribbon from the rafters or the molding of a doorway.

*Hang gay baskets filled with ornaments*
